

**Pilot 420** is the new 3D tender harbor duty workboat designed for mooring and line handling. It is a stable and sturdy round boat with a 5mm aluminum hull, a dense internal structure and extra fendering made of resistant polyurea. Thanks to its compact dimensions and the removable mooring bits it is very easy to transport

- Bow :**
- Reinforced mooring bit with light stand
  - Two ventilated Chest with water drainage on portside and starboard
  - Anchor locker
  - 60L reinforced anti-leaks fuel tank, easy fill/no spill
  - Easy access to the front panel with large front steps
  - Two small front mooring bits

- Stern :**
- Easy back access with rounded anti-collision shaped steps
  - Self-draining floor
  - Two small back mooring bits

**Customization options :** customizable hull color and fender pattern, additional winch and side door access available on request
